

## Nilfisk announces the release of its latest compact SC4000 scrubber dryer

Ideal for hospitals, schools, and retail stores

### FOR IMMEDIATE RELEASE - (May 15, 2023) -

Today, Nilfisk officially introduced its latest entry to the floorcare market with the launch of the SC4000 ride-on scrubber dryer. Designed to perform in narrow spaces the SC4000 is ideal for operation in hospital corridors, school hallways, and retail stores.

### Compact, powerful, versatile scrubbers for a variety of surfaces

The SC4000 is a compact ride-on scrubber dryer, with a scaled-down design and 125L tank, making it capable of easy maneuverability in narrow spaces, and able to pass through standard-sized doorways with ease.

It has all the power, features, and functionality to maintain floors in high-traffic areas yet is compact enough in size to reach areas that cannot be cleaned by larger, less agile machines. This gives the operator the opportunity to clean numerous areas within a facility or store hassle-free.

### Great for the environment and for business

The SC4000 uses advanced technologies that minimize resource use and reduce cleaning costs. SmartFlow™ technology adjusts water and chemical consumption to the actual operating speed to minimize water and chemical use, while EcoFlex™ adjusts water flow, detergent dosing, and brush pressure, to best optimize resource consumption.

Agile, flexible, and easy to use, the SC4000 is ideal for institutional, hospital, and retail cleaning and has all the power, features, and functionality needed to keep floors sparkling clean.
